Sandy, yes, I can provide some context for the statement about treatment operations ceasing. Also, it appears you edited Richard Sisk's version of the talking points rather than the points I sent, and there are a few edits that I had made per a conversation with Steve Wharton that were not in Richard's version. Do you want me to include these?

Looks good.

My only comment --one bullet refers to the termination of treatment, but there is no predicate for that. Might want to add a bullet on how that came to be.

- Sampling by EPA and the Animas River Stakeholder Group confirms significant increases in the levels of cadmium, zinc and lead in Upper Cement Creek since 2003 when treatment operations ceased.

Thanks

Jim-

EPR attendees for Tuesday's 7:30 am mtg with legislators listed below Since most folks may be leaving from home, we suggest meeting around 7:15 at the Capitol. Could you recommend a central location to folks or should they go directly to Committee Room 354?

Martin Hestmark
Bill Murray
Steve Wharton
Mike Holms
Jennifer Lane

Talking points, are attached for your review. The stakeholders including Sunnyside have provided feedback. Steve/Mike will be prepared to present background information including visuals of site. Please provide any feedback on talking points to Jennifer and cc Martin and me.

Sandy -- Sen Roberts' office called for a count of the number of people we're going to be at the meeting Tuesday next.

It will be Committee Room 354 at the Capitol.
